

# Vibratory plates

**WACKER  
NEUSON**  
*all it takes!*

# These reasons speak for vibration plates from Wacker Neuson.

## 1. Uncompromising economic efficiency! With innovations for optimum compaction performance.

Great performance, low consumption. No element is too much. But it's full of ideas and technologies that make operation and work easier for you. You will only find this combination with the vibratory plates from Wacker Neuson.

## 2. Reliable operation! With the proven quality of the compaction specialists.

Unload. Switch on. Get started. And then straight to the next project. You can't afford to stop. That's why our vibration plates run reliably for as long as you need - supported by our first-class service.

## 3. Your needs in focus! With the complete range of compactors.

The extensive product range of vibratory plates is not only perfectly matched to your different application areas, but is also exemplary in its maintenance. We would be happy to advise you which product and accessories are the right ones for your project - and help you with financing.

### Wacker Neuson—all it takes!

We offer products and services that meet your high demands and diverse applications. Wacker Neuson stands for reliability. Of course, this also applies to our wide range of vibration plates. We do our best every day to ensure your success. And we do this full of passion for our jobs.

# Compaction expertise to the last detail.

### Pinpoint compaction

Compatec shows you when no further compaction is required with the respective unit. This prevents over-compaction and overload.

### Transport in no time

Whether on the construction site or in the vehicle: sophisticated details make transporting the vibratory plates convenient and easy.

### Diesel or gasoline drives

High power reserves and long service life characterize the engines of all models. Many models are optionally available with a gasoline or diesel drive engines.

### Remote-controlled operation

The models DPU80r, DPU110r and DPU130r can be operated conveniently and safely via infrared remote control. Read more on pages 19 and 23.

### Low hand-arm vibrations (HAV)

Low hand-arm vibrations (HAV) are essential, especially during long-time application. Almost all reversible vibratory plates from Wacker Neuson can be used without a time restriction, sometimes even without a documentation requirement.

Wacker Neuson has been awarded the ECO seal for particularly economical and environmentally friendly products, including the DPU130r vibration plate.

# Overview of all vibratory plates.

## Forward traveling:

AP1840e	AP1850e	AP2560e	VP1030	VP1135	VP1340	VP1550
18 kN	18 kN	25 kN	10 kN	11 kN	13 kN	15 kN
> Page 06			> Page 10			

## Lightweight and reversible:

VP2050	WP1540	WP1550	DPS1850	WPU1550	DPU2550	DPU3050
20 kN	15 kN	15 kN	18 kN	15 kN	25 kN	30 kN
> Page 10	> Page 11		> Page 12			

## Medium-weight and reversible:

DPU3750	DPU4045	DPU4545	DPU5545	DPU6555	DPU80
37 kN	40 kN	45 kN	55 kN	65 kN	80 kN
> Page 12	> Page 14			> Page 16	

## Heavy and reversible:

DPU90	DPU110	DPU80r	DPU110r	Coupling set	DPU130r
90 kN	110 kN	80 kN	110 kN		130 kN
> Page 16		> Page 18		> Page 20	> Page 22

## Heavy and remote-controlled:

# The right solution for every type of application area and application area.

**A good result** for asphalt work thanks to the efficient sprinkler system.

**The Compatec display** for the models from 45 kN will provide you with information about the compaction progress.

**No familiarization period necessary:** operation of the remote control is almost self-explanatory.

**Minimal hand-arm vibrations** for fatigue-free and comfortable working.

**High productivity** due to high compaction force in conjunction with fast forward and reverse motion.

**The most lightweight, reversible vibratory** plate convinces not only in gravelly sand beds: the WPU1550.

**Remote controlled:** the most powerful vibratory plate on the market: DPU130r.

**Cable-free electrical:** the AP1850e allows emission-free work with full freedom of movement.

## Battery-powered vibratory plates

The battery-powered vibratory plates by Wacker Neuson are the world's only cable-free electric vibratory plates. They work completely emission-free and are therefore suitable for many sensitive areas of application. These can do everything a normal vibratory plate can do: compaction of soils, paving stones and - with optional water tank - asphalt compaction.

### Emission-free vibratory plates are ideal for:

- Areas where emissions can become dangerous, e.g. trenches, tunnels, interiors, etc.
- Construction projects with strict emission requirements, e.g. in city centers or for major public projects
- Small to medium-sized civil engineering sites - one battery charge per day is sufficient for typical operating times
- Construction sites with high emission levels for the operator, e.g. with many devices in confined spaces or high temperatures with little wind movement
- Water protection areas where the use of internal combustion engines is generally prohibited

**Robust electric motor** based on time-tested and proven components

**Optimum water distribution** due to wide sprinkler bar

**Completely maintenance-free**, since the electric motor is mounted directly on the base plate and therefore does not require a V-belt for power transmission.

**Sturdy protective cage** also enables lateral guiding

**Guide handle can be** folded down, thus more compact during transport

**Powerful lithium-ion battery**, can also be used on other battery operated devices by Wacker Neuson thanks to a modular concept

**Easy starting at the push of a button** replaces the cable pull

**Rugged, durable base plate**

**Optionally with water tank** for emission-free compaction of asphalt surfaces.

**High surface capacity (> 800 m<sup>2</sup>):** one battery charge is enough for at least one workday.

	AP1850e	AP1840e	AP2560e
Operating weight <sup>2</sup> (kg)	97	93	147
Surface capacity <sup>1</sup> (m <sup>2</sup> /h)	800	648	756

<sup>1</sup> Depends on the soil and environmental influences

<sup>2</sup> Water tank model plus 10 kg

## Battery with system: once purchased, twice used, lots saved.

The powerful batteries BP1000 and BP1400 fit into our vibratory rammers as well as into the vibratory plates. The change is done in a few steps and in seconds - without any tools. This is not just practical, but also saves costs, since you only have to buy as many batteries as machines are in use at the same time. And the transport is also easier - in the true sense of the word.

## AP2560e: The paving stone specialist.

Wacker Neuson offers emission-free solutions for any surface: while the vibratory plates AP1840e and AP1850e are "at home" on ground and asphalt, AP2560e has been specially developed for vibrating paving stones.

## Battery power in two different power classes: BP1000 and BP1400.

Lithium ion rechargeable batteries have been specially developed for use in vibrating machines. They have a particularly extended running time, are extremely robust and easy to handle. In addition, they are continuously developed by us - thus, your machines are always in keeping with the latest technological developments.

- Consistent power output across the entire discharge phase, therefore full compaction performance from the first to the last minute of working
- Can be charged quickly with protection against overloading
- Active cooling while charging preserves the battery

**Connect and recharge:** with standard battery charger in four hours (e.g. overnight), with quick charger in 80 minutes.

**Clear operation:** starter button and charge indicator.

## Single-direction vibratory plates

Easy to maneuver and extremely mobile – with the small single direction vibratory plate, you will effortlessly reach any narrow spot.

	VP1030	VP1135	VP1340	VP1550	VP2050
Power output (kN)	10	11	13	15	20
Weight (kg)	50.8 – 51.2	60.5 – 63.7	80.7 – 84.5	90.8 – 94.6	93 – 99
Type of engine	Gasoline engine				

### VP series:

- Optimum watering through maximum supply quantity, comfortably adjustable with a large voltage regulator
- At all times, sufficient water flow thanks to high-quality filter
- A full workday of long, comfortable working thanks to very good attenuation of the control handle (hand-arm vibration values below 5 m/s<sup>2</sup>)
- Easy access to the tank and optimum balance when loading by 90° turned lifting eye
- The narrowing control handle makes it ideal for working along walls: no sanding marks on the wall, more hands-free (from VP1340)
- Robust, durable cylindrical roller bearings
- Additional front handle facilitates transportation, e.g. by two people
- Ideal for asphalt compaction: a bent control handle provides stability in the case of lateral guide, e.g. on curbs
- All models available without water tank and sprinkler system

Convinces with all-round qualities for small areas and niches, mixed soil types as well as interlocking paving stones and asphalt.

Ideal for long-time application in asphalt and paving stone compaction, for processing top layers and subbases and can be adjusted to different ground conditions.

### DPS series:

- The versatile DPS1850 Vario: adjustable centrifugal force to adapt the compaction force to different soils and layer thicknesses
- Asphalt specialist DPS1850 asphalt: with an 11-liter water tank, sprinkler system and protective frame. Outfitting also available as an accessory for DPS1850 Basic and DPS1850 Vario

	DPS1850 Basic	DPS1850 Asphalt	DPS1850 Vario
Power output (kN)	18	18	18
Weight (kg)	114	139	116
Type of engine	Diesel engine		

Particularly efficient in asphalt compaction: the 11-liter water tank allows long uninterrupted work.

### WP series:

- Sturdy tubular frame provides complete protection and handles for transport and lateral operation. Lifting eye integrated
- The base plate is made of a very wear resistant material with a high surface quality for perfectly compacted asphalt
- 2 operating widths available (400 mm and 500 mm)
- High quality Honda gasoline engine
- All models available without and with 11-liter water tank and sprinkler system

	WP1540	WP1550
Power output (kN)	15	15
Weight (kg)	86 – 92	89 – 96
Type of engine	Gasoline engine	

**High level of mobility on the construction site:** thanks to the optional wheel set (from VP1340 and for all WP models).

**Accessories for asphalt work:** 9-liter water tank with sprinkler system.

**Practical for asphalt work:** equipment can be pulled, since the control handle can be swiveled to the front (only WP series).

**Special Vario exciter** allows variable adjustment of centrifugal forces, in order to adapt the compaction force individually to the ground - ideal also for the vibration of interlocking paving stones.

## Lightweight reversible vibratory plates

More operating comfort due to the forward and reverse travel direction combined with a compact design – that is what the small reversible vibratory plates from Wacker Neuson offer you.

DPU2540*	
Power output (kN)	25
Weight (kg)	145 – 160
Type of engine	

DPU2550	DPU2560	DPU3050*	DPU3060*	DPU3070*	DPU3750*	DPU3760
25	25	30	30	30	37	37
166	171	181 – 206	190 – 215	195	247 – 265	274
<b>Diesel engine</b>						

\* Models optionally also available with gasoline engine (BPU)

Economical solution thanks to the very convincing price-performance ratio.

### WPU1550

- Smallest and most lightweight reversible vibratory plate from Wacker Neuson
- Solid steel pipe frame offers the possibility of lateral guidance as well as reliable protection of the engine and water tank
- Base plate made of high quality nodular cast iron: for easy turning on asphalt, without roughing it up
- Sturdy transport roller with a wide contact surface prevents tracks in fresh asphalt
- Sprinkler system for optimal water distribution across the entire width of the base plate

WPU1550	
Power output (kN)	15
Weight (kg)	90
Type of engine	Gasoline engine

### DPU series

- Handle-attenuation for fatigue-free and comfortable working (hand-arm vibrations under 5 m/s<sup>2</sup>)
- Electric starter is available as an option for the DPU3050, DPU3060, DPU3750 and DPU3760 models
- Extremely economical and durable due to break-proof, low-wear materials
- Fold-down and displaceable lifting eye
- Base plate made of wear resistant nodular cast iron guarantees a long service life

Widths from 40 to 70 cm available

For the compaction of paths, trenches, in confined areas, for paving stones or maintenance work.

**Very easy to maneuver:** thanks to the specially shaped base plate of the WPU1550.

**Integrated wheel set:** maintenance-free and sturdy – even in the toughest conditions.

**Perfect drawbar attachment:** self-locking and absolutely backlash-free.

**Top-speed version:** for the high compaction performance with paving stone laying.

## Medium-weight reversible vibratory plates

For long-time application, you can rely on the extremely high compaction performance of the medium-weight reversible vibratory plates from Wacker Neuson. Hand-arm vibration (HAV) values far below the trigger value save the effort of documentation.

### DPU series

- First-class compaction force
- Handle attenuation for fatigue-free and comfortable work
- Engines with high power reserves provide for a long service life
- Intelligent functions, such as low oil shutdown, self-adjusting V-belt, maintenance-free alternator
- Base plate made from wear resistant nodular cast iron
- Optional outfitting for electric starter models: Compatec, operating hour meter, extra-wide extension plates

For professional long-time application, the compaction of anti-frost layers and subbases in road and highway, path and parking lot construction, the vibration of heavy interlocking paving stones, thanks to the 69 Hz frequency as well as for the backfilling of buildings.

All-rounder for all construction sites

Time-tested and proven for all application areas in road and highway construction and civil engineering. Even vibrates heavy interlocking paving stones and reliably compacts very cohesive soils.

	DPU4045	DPU4545	DPU5545*	DPU6555
Power output (kN)	40	45	55	65
Weight (kg)	376	402 – 425	399 – 447	480 – 527
Type of engine	Diesel engine			

\* Model optionally also available with gasoline engine (BPU)

### No documentation requirement:

hand-arm vibrations (HAV) are below 2.5 m/s<sup>2</sup> thanks to the vibration-reduced drawbar.

Low hand-arm vibrations

=

Unit operation without any time restrictions

**Without changing your grip:** change the travel direction or travel speed by moving the handle.

**Safe in every case:** if the guide handle is released, the unit only vibrates on the spot.

**Compatec compaction display:** it indicates when the maximum compaction has been achieved with the unit. Learn more at: [www.wackerneuson.com/compatec](http://www.wackerneuson.com/compatec)

## Heavy-weight reversible vibratory plates

With the DPU80, DPU90 and DPU110 models, we offer you a finely scaled selection within the range of heavy vibratory plates. So you always have exactly the compaction performance that you need. And independently, for whichever equipment you choose: in terms of operator friendliness, all models are equally convincing.

### Virtually vibration-free

control handle allow working without time restriction - swiveling for intuitive directional changes and higher level of safety

### Quick release of the drawbar

by means of a foot lever and immediate return to the previous operating position: optimal for trench shoring

**Open base plate:** easy to clean without the risk of damaging the hydraulic hoses

**Available as an option:** machine protection (adjustable behavior in case of overload) or Compatec (includes machine protection)

**Better protection of the drawbar and hood** when displaced by the 90 ° rotated Eyebolt

**Water-cooled engine** for significantly reduced noise emissions and a very efficient engine cooling.

**Large air filter** for long engine running times and maintenance intervals

**Sturdy hood** made of a tubular frame and steel plates, split and swiveling, durable as well as optimally designed for all maintenance work

**Large, easily accessible fuel tank with visible fill level** sufficient for approx. 4 hours of continuous operation

Thanks to low height, particularly suitable for heavy, cohesive soils and in trench shoring – especially for long-time application.

**Large, easily accessible tie-downs** and therefore less transport damage

	DPU80	DPU90	DPU110
Power output (kN)	80	90	110
Weight (kg)	756/771	756/771	813/830
Operating width (mm)	670/770	670/770	870/970

830 mm

**Clearly arranged operator panel:** electronic operating displays and configurations, e.g. for overload protection, anti-theft PIN as well as error memory.

**Easily release** the center pole lock via the pedal.

**At a glance:** the LED lights of the compaction control Compatec show you the degree of compaction.

**Simply fold up the hood** and all control and maintenance points are easily accessible.

# Heavy-weight remote controlled vibratory plates

The DPU80r and DPU110r remote-controlled vibratory plates allow for safe work and sensitive control at all times.

## DPU series: benefits at a glance

- No load from hand-arm vibration or exhaust fumes to the operator - thanks to the vibratory plate.
- High level of safety: the equipment remains stationary if clear line of sight is lost
- Long engine running time and maintenance intervals due to large air filters
- Durable and optimum for all maintenance work: robust hood made of tubular frame and steel plates, bifurcated and swiveled
- Optimum for application in trench shoring due to low height
- Less transport damage due to large, easily accessible lashing lugs
- Easy cleaning without damage to hydraulic hoses, thanks to the open base plate
- Large, easily accessible fuel tank with a visible fill level, sufficient for about 4 hours of continuous operation
- Integrated machine protection, adjustable in case of overload: warning, reduction of rpm or shutdown

Innovative infrared remote control ensures high level of safety for operators and the environment. Therefore, the operator can stand safely outside the trench, protected from vibration, dust and noise.

DPU80r      DPU110r

Power output (kN)	<b>80</b>	<b>110</b>
Weight (kg)	<b>709/724</b>	<b>793/810</b>
Operating width (mm)	<b>670/770</b>	<b>870/970</b>

**Direction change with simultaneous travel:**  
for clean turning of curves and a high compaction performance.

**Far-reaching control:**  
a transmission field of up to 20 meters and an angle of 45° guarantee a high level of working comfort.

**High level of safety:**  
it automatically stops if there is no clear line of sight between the operator and the compaction equipment.

**Intelligent proximity recognition sensor:**  
the machine stops automatically when the minimum safety distance between the operator and machine is less than 2 m.

**Remote control** for high operating comfort and sensitive stepless control.

**Full service accessibility** with few handgrips.

**The water-cooled engine** is especially quiet in operation.

# Coupling set

Connect three DPU110 vibratory plates to a high-performance machine. The coupling set offers extreme surface and compaction performance - ideal for crushed stone compaction in railway construction and for large areas in earthworks. Compared to a roller, it is considerably lower priced to purchase, more economical in fuel consumption and easier to transport. The vibratory plates can also be used individually. Thus, maximum flexibility can be obtained.

- Automatic infrared connection of machines via "Plug and Play"
- Extreme operating width saves time and time-consuming turning maneuvers in narrow track bed
- Safe control via infrared remote control, without hand-arm vibrations and away from dust and noise
- Proximity recognition sensor and field of view function offer maximum safety for the operator and the vicinity (see also p. 19)
- The remote control can be charged under the hood - no additional power supply required
- Economical use of the machines - with coupling set or individually
- Compamatic: Compaction display on coupling set, clearly visible for the operator, as well as documentation via GPS in Telematics portal

	3-part coupling set:	2-part coupling set:
Power output (kN)	3 x 110	2 x 110
Weight (kg)	2,616	1,727
Operating width (mm)	3,000	1,985

**Coupling linkage:** sturdy mechanical connection of machines, mounted with few screws

**3 transmitter and receiving units:** automatic connection of machines and remote control

**Remote control can be loaded on the unit,** under a lockable hood

**Unique operating width** for extreme compaction performance

**Flexible lifting:** the lifting beam can be used both for the 2-unit and for the 3-unit coupling set.

**Stable coupling:** quickly and reliably connected with a few screws.

## Compamatic = Compatec + Telematics.

Optimal compaction control with GPS tracking: the innovative Compamatic function records the machine location during compaction via GPS and documents the compaction clearly on a map. This gives you a quick overview of work progress and compaction quality. All telematics data can be retrieved in a protected area from our EquipCare portal.

# DPU130r

The DPU130r is the most powerful vibratory plate on the market and exceeds all expectations: its compaction performance approaches that of a 7-ton roller. Thanks to the remote control, you can also compact places with the DPU130r that are difficult to access.

DPU130r	
Power output (kN)	130
Weight (kg)	1,170
Operating width (mm)	1,202

**A high level of safety** due to infra-red remote control with a proximity recognition sensor and automatic shutdown if the line of sight is lost

Offers a compaction performance like a 7-ton roller and can also be used in twisting and winding areas due to the high level of maneuverability.

**Overload sensor** to protect against damage to the equipment

**On-board computer for comfort** functions, such as anti-theft protection or extensive diagnostic options

**Very simple maneuvering** thanks to the unique, two-part base plate, e.g. along manhole covers and other obstacles

**Large, easily accessible tie-downs** and therefore easier securing and less transport damage

**The best service access** – simply fold open the cover.

**A low loader is not necessary:** the DPU130r only weighs 1,200 kg and can be transported on a truck bed.

**Excellent steering:** stepless speed adjustment with simultaneous high reaction speed.

**High level of safety:** trouble-free operation of up to three machines simultaneously.
